

# Build Generative AI operations at scale

Abhishek Agarwal

05-17-2024 | ProductCamp RTP

# About Me

## Abhishek Agarwal

+ 1 (475) 239-8726

✉ [abhishek.agarwal9219@gmail.com](mailto:abhishek.agarwal9219@gmail.com)

📍 New York,, NY

## Strengths

- Leadership
- Innovation
- Collaborate
- Adaptability
- Learning

## Education

MBA  
Yale SOM

B. Tech (Hons)  
IIT Kharagpur

## Experience

- HPE
- Amazon
- Unilever

## Personal Interest

- Born & raised in India
- Fun fact: Goal of visiting every continent
- Extend access of technology
- Promote sustainable development

## Focus

Responsible  
ML/AI Product  
Development

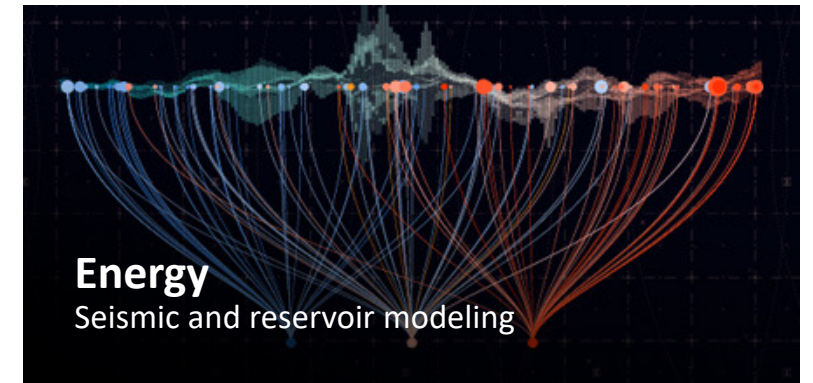

## Financial services

Fraud detection, ID verification

## Government

Cyber-security, smart cities and utilities  
Large mission-critical applications

## Energy

Seismic and reservoir modeling

## Operations

Employee productivity, faster innovation, cost Savings

## Retail

Video analytics, shopping patterns, smart shops

## Health

Personalized medicine, image analytics

## Consumer tech

Chatbots, new customer support experience

## Service providers

Network monitoring, support automation, IT service management

## Manufacturing

Quality control, video analytics and prescriptive maintenance

# Generative AI Journey

Data

Compute

Algorithms

**Human Lifetime**

**1 Billion Words**

**Foundational Models**

**Trillions Words**

How  
To...

# Generative AI Adoption Maturity Levels

Business Value Generated at every Level

## 01 Emerging Level

- Build training programs for business and technology teams
- Business experiments with prompts on nonproprietary use cases on market leading open/closed LLM.
- Technology teams help with making data ready for Model consumptions

## 02 Progressive Level

- An AI Policy is established to ensure compliance..
- Business is able to use a hosted model to solve their proprietary use cases
- Human prompts are enhanced programmatically by systems

## 03 Growing Level

- Retrieval Augmented Generation based Architecture in place
- Finetuning of Models becomes normal, and ML Operations are operationalized.
- Agents are integrated with Models to integrate LLMs with enterprise applications

## 04 Optimizing Level

- LLMs are smaller and finetuned to run on commodity hardware
- Multi model data preparation tools in place and baked into ML Ops to make data model ready
- Costs of running Models decreases while adoption in the enterprise increases

# Generative AI – Product Managers

## Product Development

Large Language Models  
Machine Learning  
Data  
Code Generation  
Interfaces & processes  
Solving complex problem

## Product Features

Capabilities  
Values (better, faster, cheaper)  
Interaction

## Product Support

Customer Service  
FAQs  
Self improving

# AI – Value Impact

Ethics

Ethical  
complexity

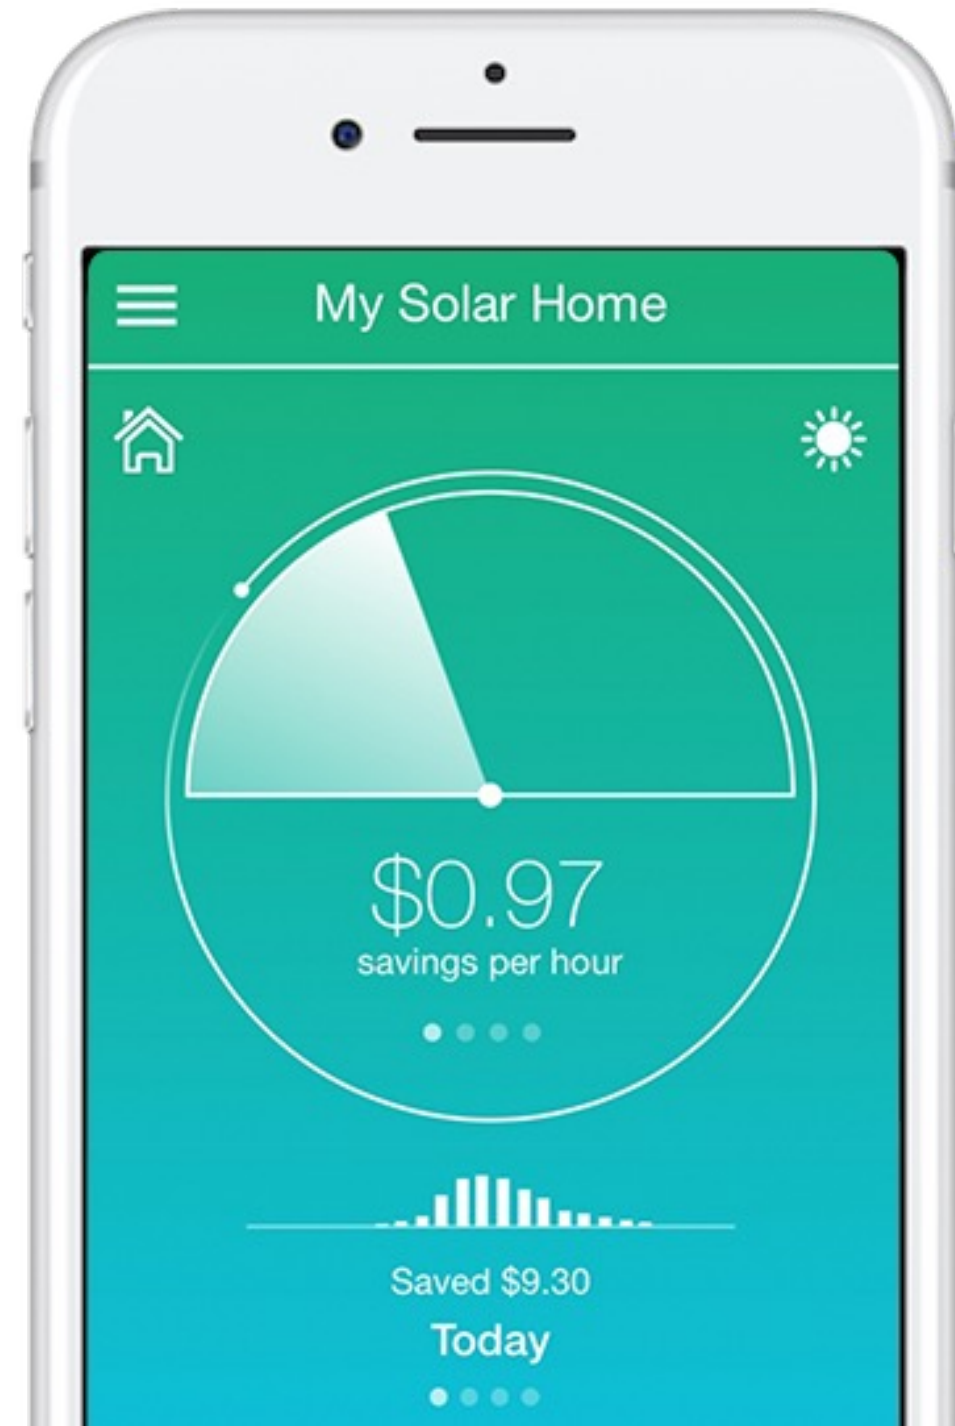

Societal  
Impact

Human  
centric  
design

## Scenario

An AI designed to optimize energy usage in homes is discovered to potentially compromise user privacy by tracking when residents are home or away. As a product manager, how do you respond?

# slido

**An AI designed to optimize energy usage in homes is discovered to potentially compromise user privacy by tracking when residents are home or away. As a product manager, how do you respond?**

① Start presenting to display the poll results on this slide.

## Best Practices

**Thank you.
